## Student Achievement and Success Report

2024 – 2025

Williamsburg Technical College (WTC), a member of the South Carolina Technical College System (SCTCS), evaluates student achievement and student success using the System's newly adopted Performance Indicators. These indicators establish a common, data-informed framework for assessing institutional effectiveness across access, progression, completion, and post-completion outcomes.

Consistent with SCTCS expectations, WTC has identified quantifiable measures aligned to each applicable Performance Indicator to evaluate student learning, academic progress, and overall student success. For each measure, the College has established clearly defined thresholds of acceptability and achievement targets to assess institutional performance and support continuous improvement.

Data associated with the SCTCS Performance Indicators are reviewed annually as part of WTC's institutional effectiveness process. Results are analyzed to identify trends, strengths, and areas for improvement, and findings are used to inform planning, resource allocation, and strategic decision-making. Through this process, WTC ensures that its evaluation of student achievement is systematic, ongoing, and aligned with both SCTCS-level priorities and institutional mission.

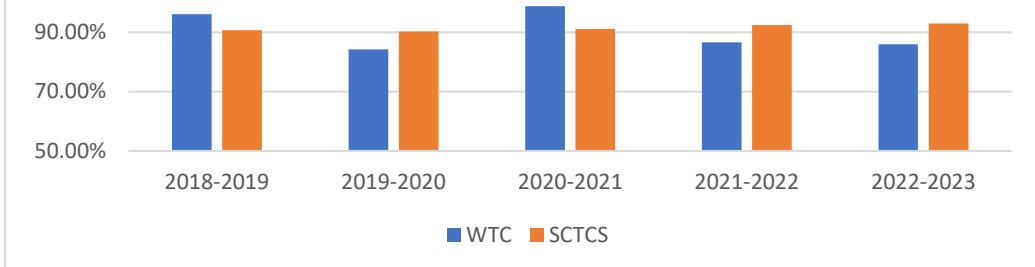

The following sections present WTC's student achievement goals, corresponding SCTCS Performance Indicators, and institutional performance outcomes.
